

Wicks & Wax

Candle and Soap Making Supplies

Macaron CANDLE Instructions

Materials:

- *Wicks & Wax* Macaron mold
- 1297 Paraffin wax (150 gm per 2 Macarons)
- ½ teaspoon Polybar (per 2 Macarons)
- ¼ teaspoon Mold releasent (per 2 Macarons)
- LX12-65 Pre-tabbed wicks
- Wax colour dye chips
- Candle scent or essential oils (optional)
- 3/32 Drill bit
- Container for melting
- Small container (teacup) for whipping
- Fork for whipping the filling

Method:

1. Ensure mold is level prior to pouring
2. Set aside some white wax to use for the filling later on
3. Using a double boiler system, melt wax with Polybar and Mold releasent to 195°F.
4. Slowly add dye to achieve desired colour. Add scents or oils.
5. Pour into 2 of the mold sections taking care to stop when the wax is level with the top of the mold. Repeat with the second colour
6. Allow to cool, and remove from the mold. Lightly trim the macaron halves with a sharp knife, or melt on a warm skillet or fry pan, to desired thickness.
7. Reheat the white wax that you had previously set aside, until just melted. Whisk as it cools, until soft and "slushy". Have a candle burning, and gently and quickly hold the flat side of a macaron half over the flame. Quickly place a lump of whipped wax onto the melted layer. Gently melt the other half macaron over the flame and add to the whipped wax, gently squeeze the filling out the sides. Take care to prevent coloured wax from running over the white filling. Have everything prepared and at hand for this step as the whipped wax has a limited working time. If required, simply reheat and re-whip
8. Once cooled use a 3/32 drill bit, make a hole through the centre of your macaron, insert a LX12-65 wick, and trim to ¼"

Always stand a burning candle on a safe heat-resistant surface.
Never leave a burning candle unattended or within reach of children.

Wicks & Wax

Candle and Soap Making Supplies

Macaron SOAP Instructions

Materials:

- *Wicks & Wax* Macaron mold
- Melt and pour glycerine soap base - White
- Soap dye
- Candle scent or essential oils (optional)
- Container for melting
- Small container (teacup) for whipping
- Fork for whipping the filling

Method:

1. Ensure mold is level prior to pouring
2. Set aside some white soap to use for the filling later on
3. Melt Soap gently on stove top using a double boiler.
4. Slowly add dye to achieve desired colour. Add scents or oils.
5. Pour into the mold sections taking care to stop when the soap is level with the top of the mold. Repeat with the second colour
6. Allow to cool, and remove from the mold. Lightly trim the macaron halves with a sharp knife, or melt on a warm skillet or fry pan, to desired thickness.
7. Reheat the white soap that you had previously set aside, until just melted. Whisk as it cools, until soft and "slushy". (a fork works really well. Have everything prepared and at hand for this step as the whipped soap has a limited working time. If required, simply reheat and re-whip

This mold can be used with cold process soap or melt and pour soap. Be aware that cold process soap will need to cure for 24 hours before it can be removed from the mold, so have other projects on the go when you make your macarons

CARING FOR YOUR MOLDS

- When not in use, store your molds in a sealed bag in a dark area to prevent drying out
- Silicone is fairly strong, but you should always handle your molds with care
- Silicone may absorb some of the dye from your candle or soap which could transfer to the next product that you make
